\$25 base fee

\$20 (20 x \$1.00 for scanned photos)

\$15 (30 x \$.50 for digital images)

\$5 for one song

*Scanning

Scanning is a very time-consuming process. I charge \$.50 per photo for this service. If you'd like to scan the photos yourself, try Walmart. They allow you to scan your own photos for a minimal fee. If the photos you scan require additional editing, I'll contact you regarding the cost.

** If you scan your own photos, scan them in the order you would like them displayed in the slideshow. Remove as much dust as possible from the photos before scanning and clean the glass on the scanner!

Number of Photos

The number of seconds a picture is displayed plus the transition time affects the mood of the slide show and determines how many pictures and songs you will need for your show.

For a snappier show, a slide time of 3 seconds and transition time of 2 seconds works pretty well, for a total of 5 seconds per image. For something like a wedding or memorial show you may want to display each image a little longer, say 4 seconds with a 2 or 3 second transition, 6 to 7 seconds per image.

At 5 seconds per image, to synchronize with a 4 minute song you would use approximately 50 pictures.

At 7 seconds per image with the same song you would use about 35 pictures.

Slide Show Order Form

digital images: _____ # Scanned photos: _____

****Images must be numbered or sorted in the order desired for the slide show.**

Song 1: Title: _____ Artist: _____ Time: _____

Song 2: Title: _____ Artist: _____ Time: _____

Song 3: Title: _____ Artist: _____ Time: _____

Photo to use on Title Screen: _____
